

ELIA AG Gives the Green Light to Online Tuning Shop

ELIA AG, one of the world's largest Renault tuner, is bringing its expansive range to the web. More products and even more original ELIA parts for optical and engine tuning are now available online.

New design and more than 1,000 parts: ELIA AG's new online shop has a huge selection of tuning parts for Renault, Dacia and Nissan models. As always, the tuning specialists at ELIA place an emphasis on quality to ensure customer satisfaction and the best possible tuning experience.

Most Extensive Tuning Range for Renault

No one else in the world can match ELIA AG's comprehensive range of Renault tuning products. Most of its products are in-house developments. These have an excellent reputation in the international Renault tuning scene as ELIA CEO Stefan Mälzer explains: "Our customers are not limited to Germany and the surrounding countries. Many Renault drivers from Asia, Australia and other parts of the world depend on original ELIA tuning parts."

In addition to engine-specific performance kits, a wide range of exhaust kits, lowering kits and aluminum wheels, ELIA also offers optical tuning parts – such as side skirts and bull bars. These are available in the ELIA tuning shop for models from Renault, its subsidiary Dacia and Nissan.

Twizy tuning with i-box provides more speed and torque

ELIA AG also has some special tuning products for Renault Twizy owners. The i-box for the Twizy provides better performance – boosting the small electric car's top speed to 92 km/h. It also provides an additional 12 Nm of torque to help it accelerate off the line. ELIA also offers side windows for the Renault Twizy – allowing drivers to enjoy their sporty ride in comfort regardless of the weather.

Cooperation with Renault

The tuning expertise of ELIA AG hasn't gone unnoticed at Renault's headquarters in Paris. As a result, ELIA recently became an official Renault supplier for Renault tuning equipment.
