The ELIAAG which has been active in the tuning business for 32 years usually focuses on the tuning of the latest models just like the other renowned German tuning companies.

For a change and very successfully, ELIA presented a freshly tuned used Nissan 350Z at the Essen Motorshow in December 2013. This sports car which is unbeatable in the price-performance ratio has been in the market for ten years now; many very attractive used car offers for this model leave a margin for tuning in order to breathe a second life into the "Youngtimer".

ELIA boosted the 350Z with impressive ELIA-own Lombardo wheels in 20 inch (front axle) and 21 inch (rear axle). ELIA additionally installed side skirts, front and rear aprons as well as a larger rear spoiler and a lower suspension setting of the chassis was realized. The six-cylinder sound already legendary in the standard (series) version was additionally boosted by the ELIA sport exhaust system.

Glammed up like that, the ELIA 350Z upstages its successor 370Z - and this on the cheap. At ELIA, the entire modification including installation and paint costs only 8294 Euro; however, individual components of this modification are also available.

January 2014
